

Install Extensions to 1000+ Sites at Once

Install any Joomla extension or WordPress plugin across 1,000 sites in one go using the mySites.guru bulk install tool - no SSH or FTP needed.

Phil E. Taylor | 12 March 2026

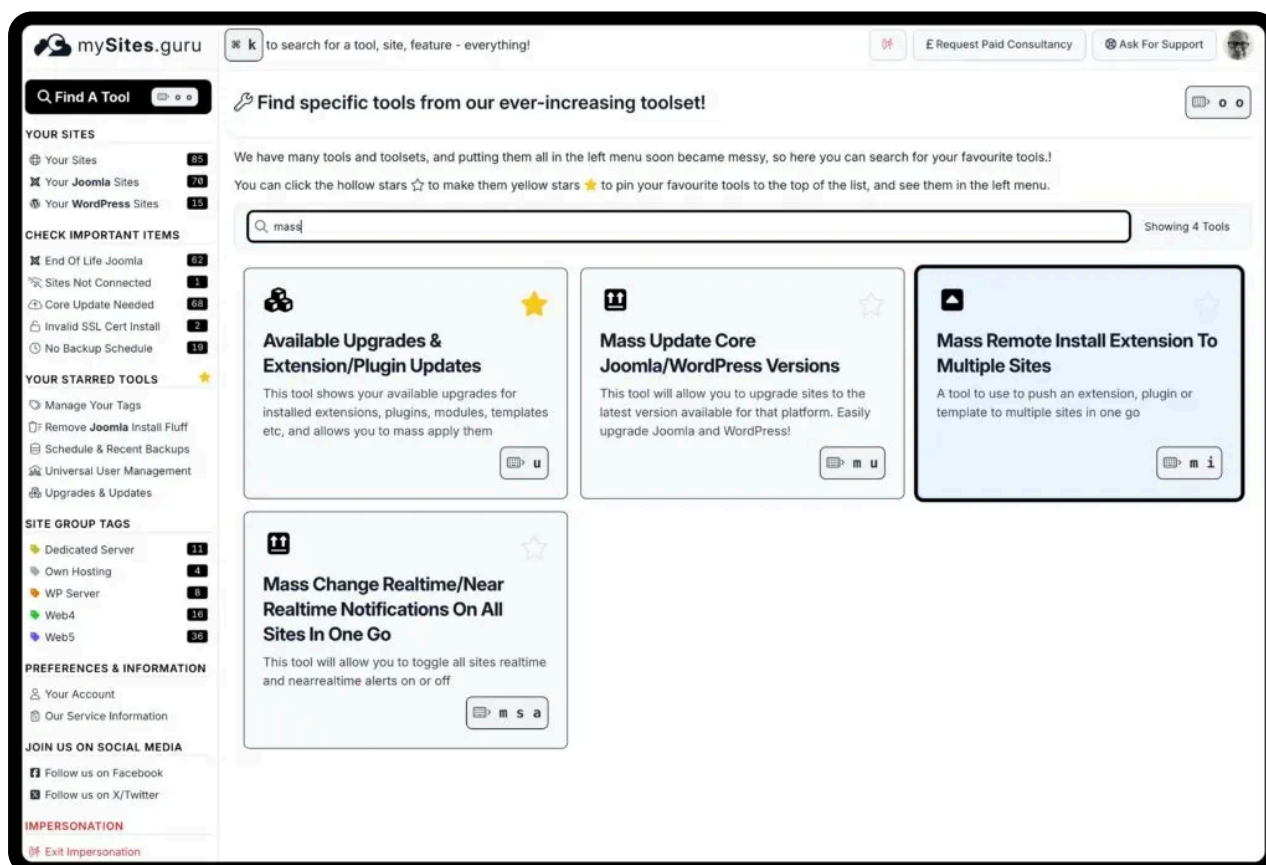

If you manage dozens or hundreds of Joomla and WordPress sites, installing the same extension one site at a time gets old fast. mySites.guru lets you **push any plugin or extension to unlimited sites in a single action** - no SSH or FTP required.

The Mass Package Installer in mySites.guru handles Joomla extensions, plugins, modules, templates, and WordPress plugins from one dashboard. You can push an update manually or upgrade across all your sites at once. When a browser update breaks the Joomla editor across every version, this is how you push the hotfix to hundreds of sites in minutes instead of hours.

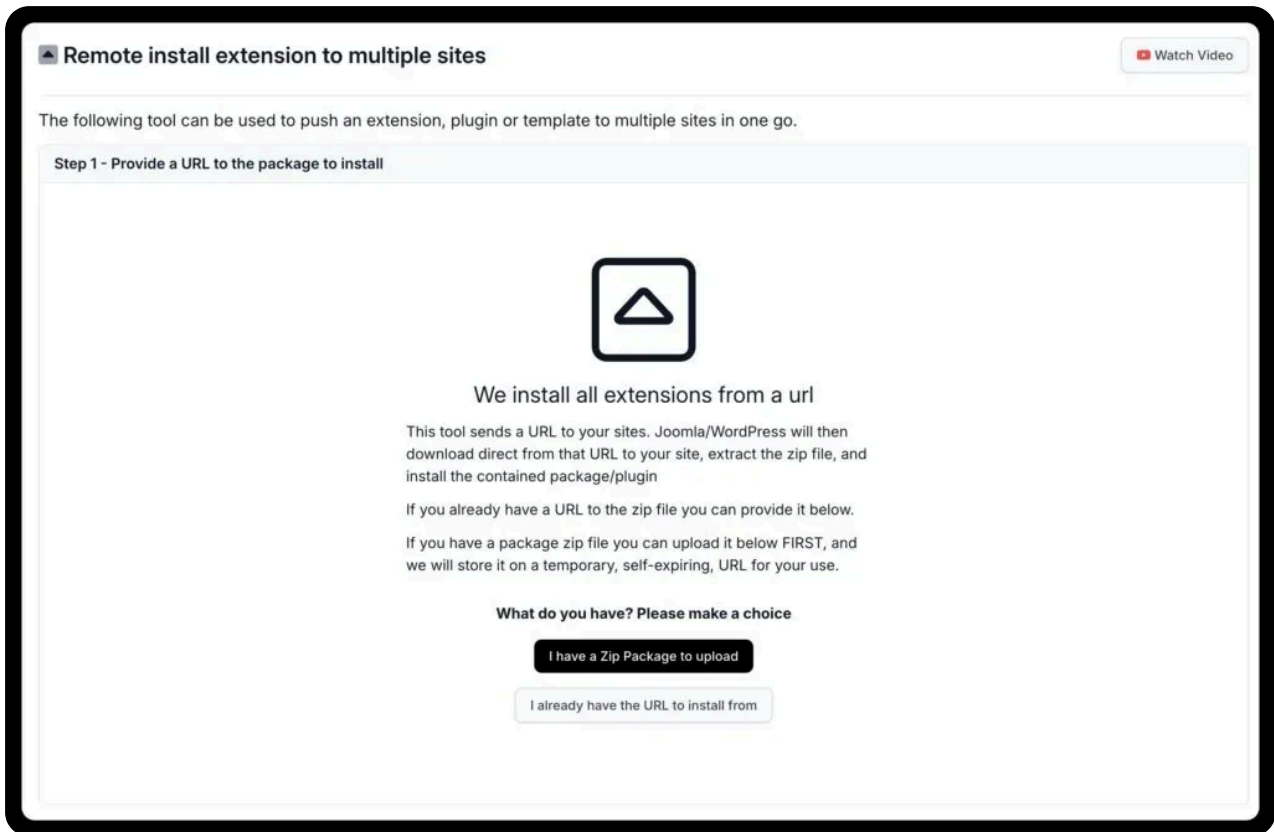

For a detailed walkthrough, see the dedicated mass plugin installer guide.

Where do I find this tool?

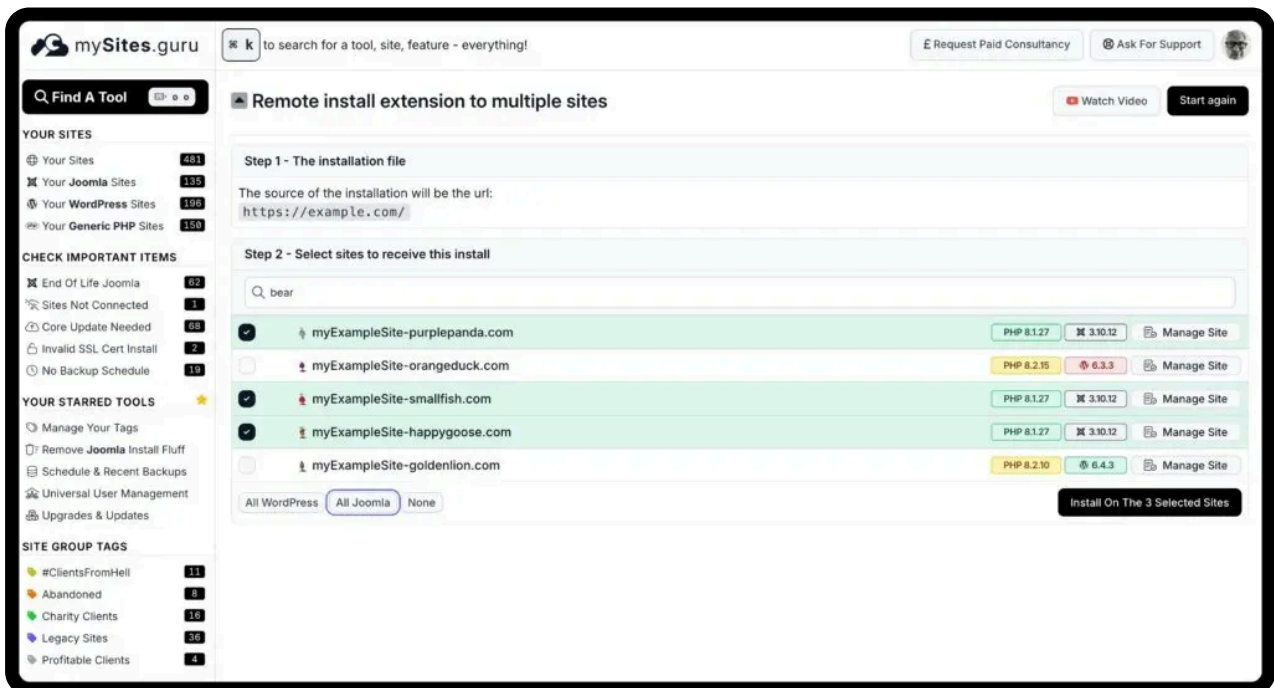

Open the main tool finder in mySites.guru and search for "Mass Package Installer."

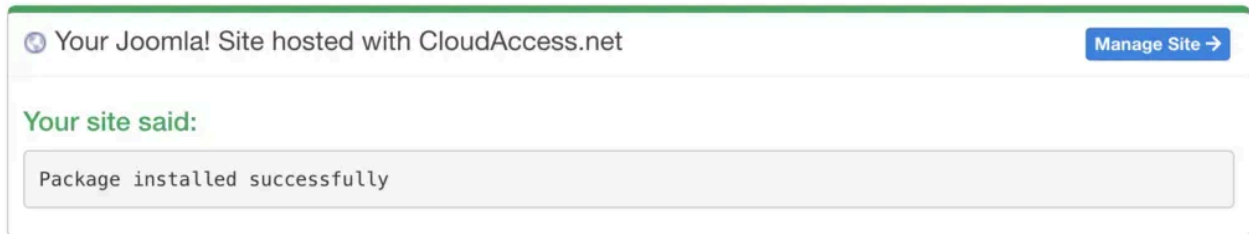

Upload a zip file or provide a direct URL to a hosted zip file in step one:

Then select one, two, or all of your connected Joomla and WordPress sites:

Click "Install Extension On Selected Sites" and grab a coffee. mySites.guru queues a background job for each site and works through them while you do something else.

That's it.

Bonus: filter sites by installed extension

Say you want to install the latest Akeeba Backup on every site that already has an older version. Use the [Extensions feature](#) in mySites.guru to search for Akeeba:

Similar to Akeeba Backup 6.3.1 by Nicholas K. Dionysopoulos

Here is a list of all the extensions that are variants of **Akeeba Backup** that we know about on your sites.

Your Variants of Akeeba Backup by Nicholas K. Dionysopoulos

COMPONENT Akeeba Backup 7.1.3	View
COMPONENT Akeeba Backup 6.3.1	View

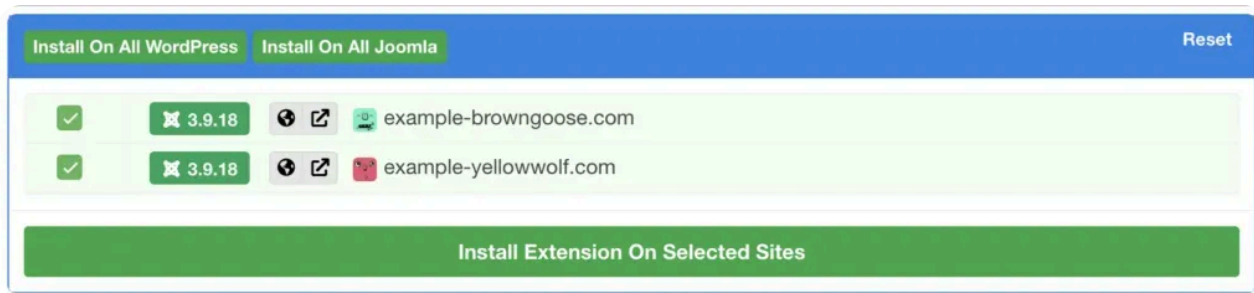

Your sites with containing a variant of Akeeba Backup

[Filter By These Sites in Mass Package Install Page](#)

   example-blackdog.com	Akeeba Backup 7.1.3	Manage Site →
   example-purpleladybug.com	Akeeba Backup 6.3.1	Manage Site →

Note: There are 28283 sites in our database with a variant of Akeeba Backup

Then click "filter by these" to jump to the Mass Package Installer with only those sites pre-selected:

Frequently Asked Questions

How do I install the same plugin on hundreds of sites at once?

Use the Mass Package Installer in mySites.guru - upload a zip file or provide a URL, select your target sites, and click Install to queue the job across all of them.

Can I install an extension only on sites that already have a specific extension installed?

Yes - you can filter your site list by a specific extension using the Extensions feature, then click 'filter by these' to pre-select only those sites in the Mass Package Installer.

Do I need SSH or FTP access to bulk-install plugins?

No - mySites.guru handles the installation remotely through your connected sites, with no need for SSH, FTP, or direct server access.

Does mySites.guru support installing both free and premium extensions?

Yes - you can upload any zip file (free or premium) or provide a direct URL to a hosted zip. It works with any installable Joomla extension or WordPress plugin package.

How long does it take to install an extension across all my sites?

Each site installation is queued as a background job. The total time depends on how many sites you selected, but mySites.guru processes them as fast as possible without you needing to wait at the screen.
