The Best Multi-Site Management Dashboard

Manage unlimited WordPress, Joomla and PHP sites from one secure dashboard. Security audits, backups, uptime monitoring and more for GBP 19.99/month.

Phil E. Taylor | 24 August 2026

Over 90,000 WordPress and Joomla sites are connected to mySites.guru. One dashboard to manage multiple WordPress sites, run security audits, backups, uptime checks and everything else. Joomla gets the same features, not a cut-down version.

The service has been running since 2012 and the price hasn't changed once. GBP 19.99 per month, **unlimited sites**.

What do subscribers actually think?

We don't write our own testimonials. Our subscribers post on Twitter/X and other platforms using their own accounts, and we link to those posts on the reviews page. Click through and verify them yourself, or read our breakdown of what ninety of this summer's reviews actually say.

What did WPMayor.com say?

WPMayor.com published an independent review of mySites.guru: read it on their site. We wrote some notes about it too.

What do you actually get?

Plenty of multi-site dashboards exist. Very few of them handle Joomla, WordPress *and* arbitrary PHP webspaces in the same panel with identical features across all three. Here's what's included:

- Best practice checks for every connected site
- Hacked file and backdoor scanning
- Uptime monitoring
- Line-by-line security audits

- Akeeba Backup and All-In-One-Backup integration with a flexible backup scheduler
- Real-time alerts when files change or someone logs into an admin panel

Still running Joomla 1.5.26? That works too. mySites.guru is compatible back to Joomla 1.5.0.

Switching from Joomla to WordPress?

Remove the Joomla site, add the WordPress one. No extra charge, no per-site fees. Same subscription, same price since 2012.

> ℹ️ **Simple pricing**
> GBP 19.99 per month. Unlimited sites, all features included.

Can I try it free for a full month?

Sign up, connect your sites, use everything. Cancel before the month ends and you pay nothing. Here's how it works.

Who handles support?

mySites.guru support means talking to Phil Taylor directly. Phil built the service, has been in the Joomla ecosystem since the Mambo days, and was one of the top code contributors to Joomla 4. No ticket queue, no first-line script readers. You talk to the person who wrote the code.

Site hacked? What does cleanup cost?

Phil can recover hacked WordPress and Joomla sites for a flat fee, no hourly billing. Details at fix.mySites.guru.

The dashboard is the centrepiece of our Joomla Agency Handbook.

Frequently Asked Questions

How much does mySites.guru cost and how many sites can I connect?

mySites.guru is GBP 19.99 per month for unlimited sites - a price that has not changed since the service launched in 2012.

Can mySites.guru manage both Joomla and WordPress sites?

Yes, it is one of the very few platforms that manages both Joomla and WordPress (including very old versions back to Joomla 1.5) from a single control panel with full feature parity.

Can I try mySites.guru before committing to a subscription?

Yes, you get a free first month - sign up, use the full toolset on your own sites, and cancel before the month ends to pay nothing.

What does mySites.guru include beyond updates and backups?

The subscription covers security audits, malware scanning, uptime monitoring, real-time file change alerts, SSL monitoring, best-practice checks, white-label client reports, and direct developer support.
