In March 2024, the well-known WordPress blog [WP Mayor](#) published an independent review of mySites.guru.

We gave them complete access to the [full toolset](#) for [managing multiple WordPress sites](#) for almost a month, with [full permission to write whatever they wanted](#).

The reviewer was [Kevin Wood](#), who has over 10 years of WordPress experience.

Kevin liked what he saw, and goes into detail in the review. The only correction we asked for was the price currency conversion - [mySites.guru is GBP 19.99 per month](#), roughly USD \$28 for unlimited sites.

The review covers the core mySites.guru features: [managing multiple WordPress sites in one dashboard](#), the [security audit toolset](#), individual site management, the [WordPress site audit](#), [uptime monitoring](#), [mass plugin upgrades](#), [universal user management](#), [real-time alerting](#), [white-label reporting](#), and our [Learn More best-practice pages](#).

What are our thoughts on the review?

The review sums up the mySites.guru service well.

Handing someone free rein to write whatever they want about a project you've poured over a decade into? Nerve-wracking. But I'm pleased the [features of mySites.guru](#) and the support I provide came through.

There's always stuff to improve. I'm here day in, day out working on it, and the price hasn't changed since 2012.

Kevin noted that parts of mySites.guru can feel complex for beginners. Fair enough. It's built for digital agencies that manage dozens or hundreds of WordPress sites - not someone spinning up their first blog.
